

Go Kart Safety Checks (GKSC)

After every kart repair, please check the following safety checks before approving all karts for use.!

- Check the condition of the Steering wheel
- Check the Steering and steering bolts are tight
- Check the Steering rod ends and tie rods for wear
- Inspect the Seatbelt buckle and clip, clip them both together and make sure the seatbelt clip is locking
- Check that the Seatbelt is locking under impact- Pull the seatbelt out fast and it should lock
- Inspect the Seatbelt webbing for wear
- Check Seat is locked - and is not sliding
- Check the Pull start cord for wear
- Make sure the Pedals are moving freely
- Test the brakes
- Check the Accelerator is working and is not sticking
- Visually check Rear tyre wear
- Visually check Front tyre wear
- Tyre Pressures - Front 25psi - Rear 25psi

Please report on your repair ticket that the - GKSC is complete
